Helpful Instructions to ease registration process

Please fill out the 3 forms attached (clinical intake, demographics intake and PCOS authorization form). Once done, drop it off or mail to us, you can also choose to email them, but we can't guarantee the security of email.

Faxing it to us is another option (203 225 0592), with the caveat that we use an electronic fax system which compartmentalizes all the incoming faxes and since we do not have a chart for you it might not be easy to find it as quickly (pretty much the same as spam folder).

At this point our office generates a chart for you and we will contact you to set you up for an appointment.

We chose the first appointment to know you so be prepared to spend some time with us.

Please note that we can not refill any scheduled substances on the first appointment.

We do reserve the right to refill any long-term medications only for a short time based on the regulation and the adverse reactions posed by these.

We are happy for having you chose us as your primary care and we strive to do the best.
